By this charity near 900 persons are maintained, including out-pensioners, and children at nurse. The revenue arises from Collections at the Church doors; 2 per cent. upon the rents of traders only; profits of the Ladies Assemblies and of work done in the House; and private donations. The amount of these falls short of the outgivings by about 600l. which is generally made up by donations and contributions.

 ed, by indorsement, to the representatives of the person in
 whose favour it was made; and it may be transferred to
 other houses when the insured changes his habitation. If
 insurance be made on the same subject in different offices, it
 must be specified by indorsement on the policy; and in case
 of loss, the offices pay proportionally. The insurers pay all
 expences in attempting to extinguish fire, or save goods,
 though not successful. If the value of a subject be insured
 in part, and damage be sustained, the insurers pay the whole
 if it does not exceed the sum insured.

The University of Glasgow owes its origin to the bounty of Bishop Turnbull; it was established in the year 1450; the bull was obtained from Pope Nicholas the fifth, and is dated the 7th of January 1450. The institution, at first, consisted of a rector, a dean of faculty, a principal, who taught theology, and three professors of philosophy; and

soon after this the civil and canon laws were taught by some clergymen.

The revenue arises from the tiends of the Parishes of Glasgow, Renfrew, Kilbride, Calder, Old and New Monkland from a tack of the archbishoprick, and from several donations which they have, at different times, received from private persons, which is expended in paying the salaries of the different professors, in repairing the buildings of the university, in adding new ones when necessary, and in defraying the expence of servants, &c.
